Todo List

Table of contents

1. high

- **[feedback]** Provide feedback (positive or negative) on the barcode package and help make it better. Thanks! # everyone

2. medium

- **[code]** Escape special characters in Code 128 messages. # open
- **[code]** Implement Australian Post Customer Barcode based on FourState base implementation. # open

3. low

- **[code]** Special bitmap generation mode that allows for the narrow bar to match exactly one pixel (smallest possible bitmap to paint the barcode in). # open
- **[code]** Optimize generation of 2D barcodes in EPS using monochrome bitmaps. # open
- **[code]** Fix problems with the SAXON 6.x integration: XML prolog generated by an XML fragment included in the output stream. (SAXON 6 will no longer be improved. The SAXON 8 extension can take its place. Keeping this item just as a reminder.) # open
- **[code]** Implement plausibility checks for configuration. # open
- **[code]** Build Playground application. # open
